

HiQ-MACH 4.3S

The HiQ-MACH 4.3S works with the latest printing techniques. The device can function as a stand-alone or can be connected to a PC. The printer has a port for SD memory cards and two USB ports, with which a memory stick, keyboard or barcode scanner can be connected directly. By linking the printer to an external memory, previously used layouts can easily be retrieved, changed or added. Wireless connectivity via Bluetooth and WLAN is also possible. With the HiQ-MACH 4.3S you can print at almost any location.

Ergonomically speaking, working with the HiQ-MACH 4.3S is also a pleasure. The transparent cover makes placing a label roll or ink ribbon stress-free. The positioning of different label roll formats is also arranged quickly thanks to the centrally placed guide. The large, full-colour touchscreen with clear symbols can be optimally operated. Entering various print data goes quickly and intuitively.

The HiQ-MACH 4.3S is available in the following configurations:

- Without knife, for perforated tape (die cut)
- With knife for continuous tape

The modern and robust appearance in combination with high-quality technology make the shape and function of the HiQ-MACH 4.3S a perfect whole.

Power supply (Volt)	100 – 240 VAC
Power consumption maximum (Watt)	100
Temperature range (°C)	5 – 40
Timer (Sec-)	NNB
Dimensions HxWxD maximum (Millimeters)	240 x 317 x 435
Weight (Kilogram)	6
Pixel WxH	480 x 272
Noise level (Decibel)	NNB
Air pressure range (Bar)	N/A
Shipping weight (Kilogram)	NNB
Shipping dimensions HxWxD (Millimeters)	NNB
Certification	NNB
