

NL-35

The NL-35 has a large press area (40×50 cm). An additional advantage of this machine is the advanced electronics that allow up to ten programs to be pre-set. This enables quick switching between different types of transfers or emblems. The NL-35 also has a counter indicating the number of press cycles.

NL-35	
Power supply (Volt)	230
Energy consumption during heating up (Watt)	2500
Temperature adjustable up to	220 ° C (+/- 1%)
Height (opened, mm)	621
Width (mm)	572
Depth (with connections, mm)	847
Dimensions of press cushion (mm)	400 x 500
Fuses 2 x	T 16A 250 V
A-weighted sound pressure	<70 dB (A)
Usage liters per cycle @5 Bar	4,71
Weight (Kilogram)	82
Shipping weight (Kilogram)	106
Pre-pressure	> 3 bar - <8 bar
Maximum pressing force	628 DaN at 8 bar
Certification	CE
