

NL-40

The NL-40 is a manual heat sealer and opens automatically after a press cycle has been completed. It can easily be converted to a heat seal press for either balls or caps due to its semi-circular element. In addition, the NL-40 can also be used to apply logos to shoes using a special lower platen.

The various platens can be mounted on the NL-40 without tools.

The smart electronics of this machine have been developed so that the required parameters like time and temperature can be set quickly.

NL-40	
Power supply (Volt)	230
Power consumption maximum (Watt)	600
Temperature range (°C)	0 - 220
Timer (Sec-)	0 - 570
Dimensions HxWxD maximum (Millimetres)	643 x 243 x 543
Sealing platen (Millimetres)	142,5 x 100
Noise level (Decibel)	< 70
Air pressure range (Bar)	N?A
Weight (Kilogram)	18
Shipping weight (Kilogram)	23
Shipping dimensions HxWxD (Millimetres)	770 x 380 x 630
Certification	CE
