HS-4-C

The manual desktop heat seal press HS-4-C is used for the application of identification tags, emblems and textiles transfers. The machine has a powerful heating element. The top platen warms up in seconds and is ready for use, even in sleep mode. The digital control buttons allow you to set the time, temperature and energy-saving mode. After completing a press cycle, the HS-4-C will open automatically. This helps to accelerate a heat sealing job considerably.

With the HS-4-C you can switch platens easily from medium to a smaller size and vice versa without using any tools.

HS-4C	
Power supply (Volt)	230
Power (Watt)	600
Operating temperature (°C)	204
Temperature range (°C)	20 – 230
Press time range	1 – 60 sec.
Sealing platen (Millimeters)	125 x 95
Machine height, open	550 mm
Machine height, closed	240 mm
Machine width	550 mm
Machine depth, open	350 mm
Machine depth, closed	350 mm
Net weight (Kilogram)	21
Gross weight, including packaging (Kilogram)	23
Fuses 2x	3.15 Ampere
Weighted sound pressure (A)	<70 dB

Certification	CE
