Make Your Mark

The ‘Make Your Mark’ Microsoft Windows labelling application makes laying out your labels easy. This very user-friendly software provides ample choice of fonts, label layouts and sizes. It incorporates the well-known Interleaved 2 of 5 barcode plus other common barcode types, as well as an extended range of symbols and clipart.

Integration

The ‘Make Your Mark’ program has been developed for standalone environments, yet it will function excellently within a local area network. In automatic mode, the program will pause until a text file is imported. The imported file will then be transferred into your designed label layout, where it will be ready to print!

Compatible with Windows	Windows 10 – Windows 11
Available hard disk space	15 MB
Minimum Ram memory	1 GB
Recommended Ram memory	2 GB
Software delivery	Download
Printer driver delivery	Download
