

DP-JUNIOR

Small but smart

Highlights • A low cost machine for direct printing on textile with a cliché plate

You need the best results for property marking, branding, coding or label instructions? Meet our latest asset in direct printing: the DP-Junior. A low-cost direct brand – hot stamp - machine for all textiles.

The DP-Junior uses the same type of colour ink ribbons as the DP2000T and Perm-A-Print. This so called C-tape is a Thermark Dry Ink ribbon that makes marking easy. Changing a ribbon goes quickly and it does not leave messy ink spots on fingers or work area. C-tapes are available in 11 colours and variable widths.

The print is transferred from a laser engraved cliché plate, that is operated manually. A plate can contain a company logo, a symbol or any image you would prefer. However, it is possible to add variable or temporary characters for extra information like a production date, washing instructions or size. Which makes the DP-Junior a reliable and at the same time flexible direct printing machine for best results.
