

DIGILINE EMBLEMS

FOR AN ULTIMATE AND RADIANT EFFECT

Highlights • full colour • special effects possible • fast delivery time • strong or lightweight version

Digiline is one of Thermopatch's most advanced products. The features that make Digiline emblems special are the unlimited colour options, photographic details, and the ability to produce the emblems in nearly any shape or size.

The emblems are digitally printed. Any desired colour can be ordered using the Pantone Matching System. An additional advantage of Digiline is the relatively short delivery period of 7 days following approval of the artwork.

Digiline is available in three versions: **Digiline**, **Digiline Pro** and **Digiline Low**.

Digiline

Digiline emblems can be applied to materials where strength and durability are needed. The emblem is resistant to industrial washing at 95°C. Despite this high washing temperature, the fresh, bright, and vibrant colours are guaranteed for a long time. Digiline can be produced with a woven effect, which enhances the overall look.

Digiline emblems are applied to a fabric at a temperature of 195°C. The production process and the Digiline emblems are Oeko-Tex certified.

Digiline Pro/Digiline Low

Digiline Pro/Digiline Low is lighter and more flexible compared to the standard Digiline. These emblems are suitable for promotional purposes and sportswear. A club name, logo or sponsor is presented in the best possible way with the Pro- and Low-version. In addition to the full colour images, Digiline Pro/Digiline Low effects such as 3D, emboss, gloss, and even a leather look are possible.

It is possible to apply this emblem with a Thermopatch heat sealing machine. Alternatively, to increase ease of use, Digiline Pro/Digiline Low is also easy to apply with an iron on any type of fabric. The production process and the Digiline Pro/Digiline Low emblems are Oeko-Tex certified.

Quantities

The minimum order quantity is 15 pieces per design.

Digiline Pro is applied to fabrics at a temperature of 145°C, Digiline Low at a temperature of 130°C, both emblems can be washed up to 40°C.
