FASTAG

Leaves no mark

Highlights • Flexible • Extra thin • Perfect adhesion • Pre-printable

FasTag
This tape is especially developed for labeling personalized garments where comfort is a priority. It can be sealed at 195 °C for 15 seconds or 204 °C for 10 seconds.
The FasTag label can be washed to a maximum of 95 ˚C and still stays flexible and elastic. However, the tape cannot be ironed and therefore it is not suitable for flatwork.

Possibilities
A FasTag package contains 2 rolls of 50 meter tape and 1 ink ribbon of 104 meter, and is available as die-cut tape and continuous tape:

Continuous tape:
- 30, 40, 50, 60, 70 and 90 mm width

Die-cut tape (w x h):
- 41 x 14,4 mm (5.906 labels per package)
- 53 x 19 mm (4.592 labels per package)
- 63 x 12,7 mm (6.560 labels per package)
- 84 x 23,4 mm (3.936 labels per package)
- 84 x 36 mm (2.624 labels per package)
- 90 x 48 mm (1.968 labels per package)

Ideal combination
FasTag can be pre-printed with your logo in any colour or colour combination.
By using the HiQ thermal transfer printers you can print the variable text section.

The combination of tape and ink guarantees an optimal result. The number of labels per roll depend on the size of the required label.
