HIQ-SQUIX 4.3

Exceeds all expectations

Highlights • highest quality standards • innovative technology • easy operation • reliable and fast printing • compact and modern design

The HiQ-Squix offers thermal transfer printing technology at its best. It exceeds all expectations, with a modern design, state-of-the-art technology, a generous colour touchscreen and several optional cutting devices. This printer is the best available today and can operate with or without a PC.
The professional Squix printers support a wide range of industrial applications. They have been developed with a focus on easy and convenient operation and high reliability.

The HiQ-Squix is available in various configurations:
- **As a base unit without a knife for the use of perforated (die-cut) tape**
- **With a cutting device for the use of continuous tape**
- **With a perforation knife for an easy separation of (stock) labels**
- **Rewinding mechanism for the use of Hytex labels**

Ink ribbons
By using our thermal printing media and ink, the final printed label is virtually indestructible and perfectly readable, even after a large number of washes.

Consumables
A wide range of tapes can be used with the HiQ Squix: HiQ, CombiTex, CombiPly, FasTag, Hytex and Mediron.
Regardless of whether it is used as stand-alone printer, in conjunction with a PC and software, or in a network, the Squix printer guarantees fast printing and direct label output.
