

NL-15-R / NL-15-SQR MAMMOTH

The reliable heavyweight

Highlights • Twin lower sealing platens • Heats up quickly • For high volume

Advanced

The NL-15-R / NL-15-SQR heat seal press combines advanced technology with modern ergonomic design. It heats up quickly and automatically enters energy saving mode when not used for a while.

Twin sealing platens

The double lower platens enable you to use the press productively.

This press is perfectly suited for high volume demand users. If linen rental is your business, then this press will increase the output of your stores significantly and the operators will welcome this sophisticated press.

Automatic mode

The press can be set into automatic mode, whereby the press will come down automatically when the head is moved from one side to the other.

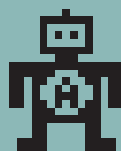

A robot pictogram in the display indicates when this mode is activated.

Round or Square

There are two versions of the NL-15. With the round platen the machine is more ergonomic as less movement is required by the operator. The square platens give more sealing surface especially when sealing emblems or transfers.

Control panel

The NL-15-R / NL-15-SQR user friendly display with only 6 keys to control all functions.

Compressor

The use of compressed air is required. If you do not have compressed air available, Thermopatch can offer a silent compressor.
