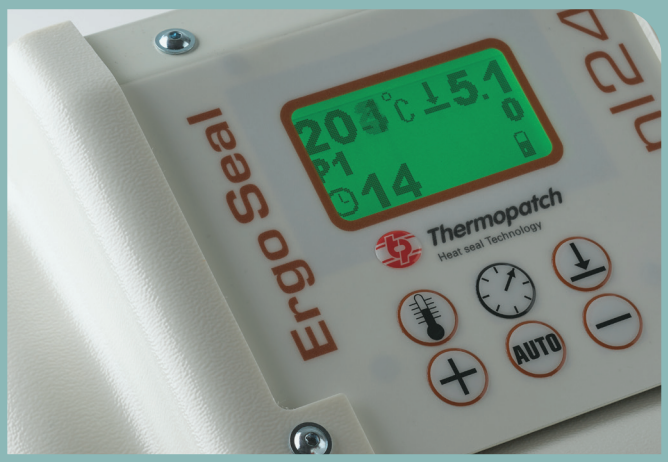
NL-24-PRO ERGO SEAL

A versatile all-rounder

Highlights • Suitable for various applications • clear control panel • spacious work area • including foot pedal

The NL-24-Pro Ergo Seal is the very versatile, practical heatseal machine from Thermopatch. Labels, emblems, repair patches and transfers; this pneumatic machine can actually do everything. Fast and sustainable. During the design of the NL-24-Pro, the demanding user was taken into account: thanks to extra working space around the bottom plate, heat sealing jobs with large or thicker items of clothing can be easily processed.


The NL-24-Pro is operated with a foot pedal. This means when in use, both hands are free, which facilitates the job. The integrated graphical display is easy to operate. Features such as press time and the desired temperature can be entered quickly. The machine is equipped with an energy-saving mode and emergency stop.
