READYPLY EMBLEMS

Extra convenience, extra safety

Highlights • Self-adhesive layer • Fast delivery • Full colour • Industrial wash

What is ReadyPly?
ReadyPly is the latest addition to our range of full-colour Ready emblems. ReadyPly is just as versatile as the original, but with the handy addition of a self-adhesive layer. This makes it even simpler to apply, with the utmost precision.

Special features
Ready emblems are heat-seal emblems from Thermopatch, available in almost every colour and shape thanks to a unique technology. ReadyPly has a self-adhesive layer that makes it very easy to pre-position on textiles. This is extremely useful if sealing needs to be done with considerable accuracy. After ReadyPly has been applied, it must be sealed for 14 seconds at 185 to 204 °C.

Colours
ReadyPly emblems are produced with a full colour process. Thermopatch uses Pantone Matching Systems© for reference (PMS C Formula Guide).

Pricing
ReadyPly, with an extra self-adhesive layer, costs on average 10% more than standard Ready emblems. Supplied for 15 items or more, ReadyPly can be delivered within 7 working days.
