THERMOPATCH VISION

For over 85 years, Thermopatch has been a leader in the development and production of emblems, transfers and labels for textiles. We aim to be the global market leader in corporate identity, with a clear vision when it comes to quality, and sustainable, energy-efficient production. Our goal is to constantly develop and improve ourselves. We will do this by continuously aligning our range of products and services with the wishes of our clients and changes in the market.

THERMOPATCH MISSION

Our mission is to promote socially, economically, and ecologically sustainable development programs, building on our knowledge and experience. The emphasis here is on individual policy instruments and an effective combination thereof. Through innovative processes and unique textile finishing technology, we want to continue to distinguish ourselves in the market, with the highest quality products and tailormade services for all of our clients.

Thermopatch is committed to continuously updating all activities, with ten universally accepted principles in the field of human rights and the fight against corruption. The core values of safety and health, the environment, the highest ethical behavior and respect for people are directly in line with the values set out in the United Nations Global Compact.

COMPANY

Thermopatch is an internationally operating organization, that has specialized in emblems, transfers and labelling solutions since 1934. We are active in various sectors: hospitality, healthcare, industry, textile care and sports. Customers recognize and value our expertise, the best possible service and high quality products. We are proud of our pioneering technologies, innovations and services. The integration of an environmentally friendly and sustainable strategy for both production and logistics makes our global business vision distinctive.From our head office in Syracuse, New York in the United States, and our European base in Almere, the Netherlands, Thermopatch reaches more than 90 countries. In collaboration with our extensive network of experienced distributors with local knowledge and skills, we are able to serve our customers worldwide and achieve our operational goals.

THE MARKET

In sports, top performance is everything. High-tech sportswear and top-quality merchandise help brands, clubs, and retailers to achieve gold. To meet the demands of the sports market – where high volumes must be matched with top quality products – it is vital that Thermopatch Sports is both flexible and compliant. We produce and dispatch all of our products from our factory in Thirsk, Yorkshire, in the United Kingdom. Utilizing the latest technology, Thermopatch Sports manufactures to the highest industry standards. Our revolutionary emblems, transfers and club crests are the answer for any player in the world of sports. The best branding solutions, combined with excellent service, keep Thermopatch ahead of the competition. When all eyes are focused on you, go for the best performance. Choose Thermopatch Sports.

3

INTO THE LIMELIGHT

FasTag Sports Pro

This flexible, lightweight, full colour emblem is exclusively designed for use on balls, boots, and soccer gloves. FasTag Sports Pro offers commercial opportunities for sponsorship, corporate gifts, team identification and retail. The product has been specifically tested in extreme conditions on all surfaces, including artificial grass and concrete.

Textra Sport

Textra Sport is a versatile transfer that is soft to the touch. It has been developed based on years of experience in heat sealing, and in combination with the latest digital printing techniques. Textra Sport shares many of the same features as ‘standard’ Textra. A great advantage of the sports version is its stretchability. With high print quality and durability, it is a great product for the kinds of supple fabrics used in sportswear. The transfers are sublimation resistant, and can be made in any size or shape, with multiple colours and gradients.

Name and Number

You simply cannot miss our sports numbers and letters. These transfers are for anyone looking for the best match appearance, and for those who want the best look for their sports outfit. Thermopatch offers strong, flexible transfers, that are characterized by high print quality, colour intensity, and durability. They are suitable for both sportswear and promotional garments, and available in multiple sizes and colours. These quality transfers can be easily applied to your garments in no time at all. Our Name & Number sports transfers come in three different styles: retro, classic and modern.

Flextrans

Flextrans is a very flexible transfer with high print quality and durability; perfect technical apparel, player and replica kits, and retail textiles. This quality transfer is easily applied to all these types of garments. Flextrans is characterized by detailed images, available in almost any size and combination of colors - including high visibility.

Digiline Pro

Digiline Pro is for anyone who wants to promote a club name, logo, or sponsor in the best possible way. DigiLine Pro emblems make a strong, flexible, and very lightweight logo that combines full colour printing with extra effects, which include a woven look, 3D embossing, or extra shine. Each effect can be produced as an individual emblem, or alternatively, for an extra special appearance, add all of the effects to one design. Choose DigiLine Pro emblems to give your promotional products or sportswear the ultimate appearance.

Woven emblems

A striking product within the extensive range of Thermopatch. These emblems have a beautiful ‘look & feel’, thanks to laser-cut technology and a raised, embroidered border, and can be made in almost any shape. In addition, this emblem is both flexible and durable. The colour palette of our woven emblems contains no less than 470 colours. Per design, images of up to 8 different colours are possible. The result is a product with sharp detail and a high quality appearance. Woven emblems can be produced with either a high or low temperature adhesive.

Sublifix

Sublifix can be applied virtually risk-free to almost any piece of sports or softshell apparel. This transfer is designed specifically with the sports market in mind. Sublifix is the evolution of Flextrans; lightweight and stretchable, and suitable when sublimated fabrics require additional branding. A detailed transfer, which can be made in any shape or colour.

Starlight

Thanks to its reflective properties, you can immediately attract more attention with Starlight. When light hits this transfer, the wearer is made more clearly visible. Starlight is an ideal transfer for promotional merchandise or to enhance sportswear. Our flexible Starlight transfers are an excellent choice to make any garment stand out.

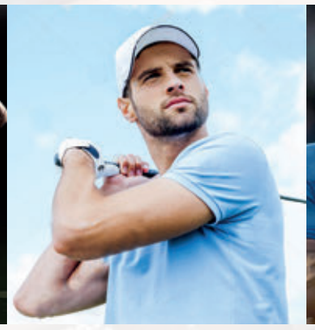
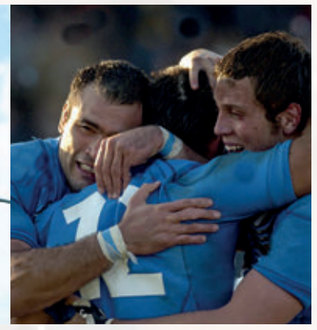
GO FOR THE BEST PERFORMANCE WHEN ALL EYES ARE FOCUSED ON YOU





Experience the best service

With the competitive nature of the UK sports commercial sponsorship market, it is important to have a local supply route. Thermopatch Sports offers a full range of pre-re-tailing services. When you need sponsor logos and crests sealing to your kits and training ranges, our dedicated team is there for you. Whatever the time constraints, we at Thermopatch will endeavour to support you and your requirements, to ensure all orders are ready on time.

5

SUSTAINABLE AND ENVIRONMENTALLY FRIENDLY IDENTITY PRODUCTS

Our climate and environment are very current topics. When Thermopatch was founded in 1934, we stated in our vision that we want to support an active approach to environmental challenges, to take initiatives to promote more responsibility for the environment, and to encourage the development of environmentally friendly technologies. It is because of this vision that we support the United Nations Global Compact, the world's largest sustainability initiative for companies.

We believe in the power of sustainability. Every part of our production process is certified to the highest quality standards. We constantly strive to improve our green performance to ensure that our range of products and services continuously meet the latest requirements in the market.

HEAT SEAL MACHINES

Looking for the perfect solution to guarantee the highest standards in sports? Work with the state-of-the-art heatseal machines from Thermopatch for applying our products, and quality is guaranteed! Hand operated or automatic; a table model or a heavy weight; our heat seal presses are designed to continuously deliver lasting and perfect results.

Our extensive range offers the perfect machine for every type of user. Will it be a heat seal machine for low volumes? Or a compressed air-powered model with double pressing plates for large volumes? Whichever model you choose, our equipment works quickly, precisely and offers maximum efficiency.

Check our recommended heat seal machines for sportswear:

7

NL-40
Smart and multifunctional

You can easily apply a logo or label to a cap or shoe with the NL-40. This machine is multifunctional thanks to interchangeable press plates. The differentplates can be mounted on the NL-40 without the use of tools. This machine has been developed with smart electronics, so that parameters like sealing time and temperature can be set quickly.

NL-28
Optimum ease of use

The NL-28 is a very easy to use heat seal machine, delivering more workspace by way of a sliding lower platen. A hand operated heat seal press with large platens, (40×50 cm), it is especially suitable for applying all sizes of transfers and emblems to garments such as t-shirts, polos and sports jackets. This model has an added advantage: the lower platen is extendable for optimum ease of use. Sealing time and temperature are easy to set thanks to the graphical display. Three different programs can be stored in the machine's memory. The press opens automatically after pre-heating and after each sealing cycle.

1 NL-30/33/35
Unparalleled and versatile

Whether you need a manual or (semi) automatic machine, single or double sealing platens, the NL-30, -33 and -35 pneumatic heat seal machines, featuring advanced electronics, offer optimum performance to every user. With each of these machines, multiple settings can be pre-set quickly and easily. The NL-33 and -35 also have a counter, so you can see how many items have been processed per order. In this series of machines, efficiency and user-friendliness prevail.
