Thermopatch
an Avery Dennison Company

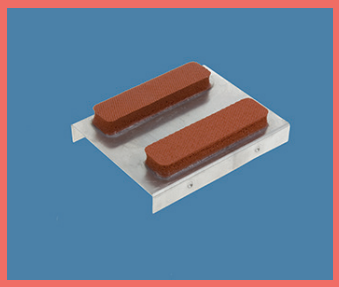
# HS-4-C

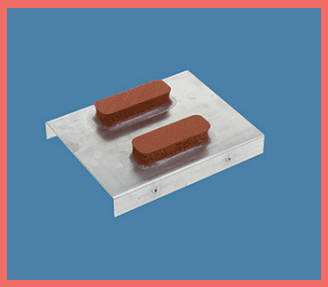
## Any way you want it

**Highlights • Automatic opening • High performance heater • Digital controls and display**

The HS-4-C is versatile, compact and swift. This type of press is ideal for those who work in health care or the clothing industry.

**HS-4-C**
This light, compact and manual desktop heat seal press can be used to seal labels, emblems and transfers onto textiles. The digital control buttons enable you to set the values for time, temperature and sleeping mode. After completing a press cycle, the HS-4-C will open automatically. This feature helps you to speed up sealing.
The HS-4-C has a high performance heater. The upper platen heats up in seconds and when in sleeping mode it can be activated in no time.

**Changeable lower platens**
The lower platen can be exchanged without any tools to a size that meets the job to be sealed. A wide range of exchangeable platens are available (optional).




**Example**
