Y-600 THERMOSEAL

For fast and efficient sorting!

Highlights • suitable for printing up to 3 lines of text, clipart, 1D barcodes and 2D codes such as datamatrix and QR • quality labels for temporary marking • can be linked to computer system • super fast and whisper-quiet inkjet printer

Y-600: new high-resolution printing technology
Go for the highest quality in temporary marking with the versatile Y-600 Thermoseal. This modern labelling machine with unprecedented printing options will be a welcome addition to any laundry to organize sorting work optimally.

Work easily and quickly
The Y-600 is an industrial inkjet printer that can print up to 3 lines of text, 1D barcodes, 2D clipart, and QR data matrix in high resolution. Thanks to the countless printing options, this marking machine can make any sorting system within a laundry environment more efficient. Operation is intuitive and very simple. For organizations such as hotels or healthcare facilities, the Y-600 makes temporary labelling of textiles easy and fast.

Print any text you want, with or without a symbol, using the fast and very quiet inkjet printhead. In one operation, a label is printed, cut, and attached to clothing in seconds. The information printed on the label is resistant to chemical cleaning and the most intensive (industrial) washing processes.

Thermoseal tape
The machine can either be used in its standard configuration, or can easily be connected, if required, to a computer system for even more functionality. Two types of Thermoseal temporary marking tapes are available for this machine in 11 different colours:

- ¼ inch tape (4635 tape)
- ½ inch tape (8635 tape)

The Y-600 is the most versatile and user-friendly labelling machine for temporary marking!
