

DIGIPRO

The future of in-house emblem production

Highlights • Create textile emblems on demand • Low production costs • Time saving • Flexibility

With DigiPro, you take full control of your emblem production - no stock, no delays, just high-quality, custom emblems on demand. Designed for industrial laundries, textile manufacturers, and corporate clothing producers, DigiPro offers unmatched flexibility and efficiency.

Producing emblems in-house means no more waiting for suppliers or holding unnecessary stock. Whether you need a single emblem or a full batch, DigiPro ensures fast, cost-effective production while maintaining industrial-grade durability and washability.

Advanced printing technology

DigiPro seamlessly integrates with the Roland MG-640 and MG-300 UV printers. These machines provide instant UV ink drying without heat, making them ideal for sensitive materials. The precision contour cutting feature ensures clean, professional results every time. With the included VersaWorks 6 software, users benefit from True Rich Color presets, a Nearest Color Finder, and powerful job management tools.

Unlimited design possibilities

From company logos to detailed photographic prints, DigiPro allows full creative freedom. Thermopatch's Design Studio simplifies the process by preparing print-ready files within 24 hours. This ensures flawless execution, whether you're printing classic embroidered effects, simulated leather patches, or innovative 3D textures like doming effects for sports branding.

High-quality printable media

To achieve the best results, DigiPro works with specially developed Digiline textile rolls, available in multiple variants:

- **Digiline / Digiline Pro / Digiline FR** – Thermoplastic adhesive-backed rolls for industrial-grade emblems.
- **FasTag Pro** - Designed for low-temperature application on balls and shoes.
- **Helmet Emblems** – for producing quality labels on either a white or transparent film
