

FIXATION TAPE

Sealing becomes easy!

Highlights • Easy to use • Fast • Increase in sealing productivity • Cost effective

Speeds the sealing of transfers and emblems...

With this Fixation tape you make positioning of emblems and transfers outside the heat seal press much easier.

Place the emblem or transfer on the article at the position where it has to be sealed and fix it with the Fixation tape. Seal the emblem or transfer, let it cool down and remove the Fixation tape, and with transfers the carrier as well, without leaving any marks.

Sealing productivity

Because you can position the emblems and transfers outside the sealing area, the heat seal press can give more output because you have less down-time and “anyone” can operate the heat seal press.

Fixation tape

The tape is supplied in one roll of 12 mm wide and 66 meters long.
