

TZ-FR Labels

According to UL, the first of its kind printable thermal label that meets 4 different NFPA standards.

TZ-FR labels are thermal printed labels without adhesive on the back and are meant to be sewn onto a garment or textile. Print your own labels in your facility, whether it is just one at a time or a run of thousands. You are not limited to one set format, change it as you see fit. Add automatically incremented bar codes, serial numbers as needed.

The TZ-FR labels meet the NFPA - 1975, NFPA - 1977, NFPA - 1971, and NFPA - 1951 standards. Red or black ink can be used to print onto the labels.

Need software for printing?

Bartender is an award winning thermal label software that is sure to meet all your needs. Use Bartender with the HiQ SQUIX thermal printer with cutter and you will have a winning combination. If you already have a thermal printer with a cutter, just let us know which one it is and we can make sure to deliver the correct thermal ink configuration to work on it.
