

Heat Seal Table

For the Easy Seal or Thermoset III

Highlights • 8" wide x 36" deep or 60" wide x 36" deep with operator cut out Formica Top • Steel Insert Pan • Hanger Bars • Adjustable Manual Crank Ergo Stand • Non-Adjustable table

An ergonomically designed table designed to fit either the **Easy Seal** or **Thermoset III** heat seal machines. The cut out fits either machine snugly and is sunk into the table to give the optimum work area and improve production.

There are a few options to consider when purchasing this Formica top heat seal table. The first being **the size**, choose between a 48" wide x 36" deep table or a 60" wide x 36" deep table with operator cut out.

The second choice to make is **adjustable or non-adjustable** table. The adjustable manual crank ergo stand is simple to crank up and down for the desired height, making it ergonomically designed for various size employees and to help improve productivity. The non-adjustable table can be set to a 30" to 36" height by adjusting the locking bolts in place.

Whichever size table or height option you choose, they all come standard with a Formica top, steel insert pan and 2 hanger bars.

Easy Seal

Thermoset III
