- Full Color Process
- Easy Placement
- 15 Piece Minimum
- Solvent Free Inks

FULL COLOR PROCESS

Digiline and Digiline Pro emblems are digitally printed on industrial grade material that will not fade, crack, peel or bleed. Your design can even feature a photograph and can be produced in almost any shape or size. minimum quantity is 15 pieces per design.

Digiline is printed on our HiQ materials that is able to withstand industrial washing at 200°F.

Digiline Pro is lighter and more flexible compared to the standard Digiline. These emblems are suitable for promotional purposes and sportswear. A club name, logo or sponsor is presented in the best possible way with the Pro version. In addition to the full colour images, Digiline Pro effects such as 3D, emboss, gloss, and even a leather look are possible.

Digiline Pro is applied to fabrics at a temperature of 295°F and can be washed up to 105°F. It is possible to apply this emblem with a Thermopatch heat sealing machine. Alternatively, to increase ease of use, Digiline Pro is also easy to apply with a hand iron on any type of fabric.

Email us your artwork along with sizing and quantities for a custom quote. To speed up artwork, provide the design in one of the below formats.

- Adobe Illustrator file AI
- Corel Draw CDR
- Encapsulates Post Script (EPS)

SEALS TO A VARIETY OF FABRICS

Sealing Specs:

Digiline

Set Heat Seal to 385°F, 55 p.s.i. and 15-20 seconds.

Digiline Pro

Set Heat Seal to 295°F, 55 p.s.i. and 15-20 seconds.

Hand Iron

- 1) Preheat iron to highest heat setting.
- 2) Place garment on ironing board.
- 3) Place the emblem on the garment where it is to be applied.
- 4) Place the iron on top of the emblem and hold in place for 5 sec. Then move the iron back and forth across the emblem for an additional 15-25 sec. Press firmly during the entire application process and be sure to seal the edges of the emblem.
- 5) Allow the emblem to cool for about 30 sec.
