

## HIGHLIGHTS

- Quick and Easy to Apply
- Economically Priced
- Industrial Washable
- Excellent Elasticity
- Up to 5 Colors

## HPT Hot Paper Transfers

*Economically Priced*

### FLOWS DIRECTLY INTO THE FABRIC

**Hot Paper Transfers (HPT)** are quick, easy, and economical to use. Mark textiles with decorative designs, property marks, brand names and more.

**HPT** inks are designed to flow directly into the fabric, creating an extremely durable mark with high elasticity and virtually no feel on the garment.

**HPT's** are supplied on a roll or they can be pre-cut and stacked. Minimums start at 500 transfers and the lead time is 2-4 weeks after artwork proof approval. A one time engraving charge will apply on all new orders.

Simply place the transfer face down on a material and heat-seal it or you can use our **DP2000T** with automatic roll to roll transfer feed system. The electronic sensor centers the transfer after each heat-seal. Sealing time ranges from 2 to 6 seconds, depending on the amount of heat used.

Email us your artwork along with sizing and quantities for a custom quote.

### Recommendations for best quality results:

1. Use 55 p.s.i. when sealing
2. Adapt the size of the sealing pad to the size of the transfer to avoid imprint of the sealing iron or use Impressio.
4. Remove the carrier while still warm.
5. In case of doubt, always contact Thermopatch.

FINALLY. A PERMANENT, INEXPENSIVE WAY TO LOSE THE TAG.  
 THE BACK OF YOUR CUSTOMERS' NECKS WILL THANK YOU.
