Impressio

Eliminate the Shine

Silicone Heat Despersing Sheets

HIGHLIGHTS

- **Eliminates the Platen Shine Mark**
- **Easy to Use**
- **Durable/Flexible**
- **Cool after each Seal**
- **Can be Used Frequently**

USE MULTIPLE TIMES

Impressio heat dispersing silicone foam sheets are ideal for use to prevent leaving behind shiny platen imprints after heat sealing on delicate fabrics.

To achieve this, you need to place the Impressio over the exposed material and around the product you wish to heat seal.

Impressio is supplied in 4 sheets (16.5" x 19.68")

Directions for use

You can apply the foam in several ways:

- Used as a cut-out mask. This is ideal for easy positioning of a heat seal product you are sealing multiple times. Any mask can be made to size and a collection of masks can be made to fit any need for recurring heat seal jobs.

- Used in strips. When sealing a variety of different sizes, strips are easily placed around the design leaving the exact spot open where heat sealing is planned.

Tip

Ensure the strips are laid against each other, not on top of each other, for even pressure. Maintain an extra 3/16th of an inch around the carrier of the transfer, emblem or label to ensure even pressure on the product.

Cut-out mask
