Reflective Transfers/Embl
High Visibility

Easy to Heat-Seal

HIGHLIGHTS

- **High visibility Reflective**
- **Customize your Logo**
- **Heat-Seal to the Fabric**
- **Enhances Garment Safety**
- **Delivered Cut & Stacked**

SAFETY

As safety has become a much greater issue in career and work wear design, reflective material has assumed more importance and with it the need for reflective emblems and plotter transfers. These products are particularly suited for those who work at night or in poor visibility like emergency services and maintenance engineers.

We can plot a wide range of reflective logos in a variety of shapes and sizes. Furthermore, a special technique was developed to print emblems on this reflective surface. These high definition images in strong colors on a reflective background will certainly attract attention!

Reflective plotter transfers are also available in flame retardant, well suited for application to textile with similar flame retardant requirements. The flame retardant plotter transfers meet the EN-469 standard.

You can also purchase the reflective tape in 2" wide rolls.

Email us your artwork along with sizing and quantities for a custome quote.

Reflective plotter transfers
1 Set the temperature from 320 to 360 °F*
2 Put the transfers with the protective layer SIDE UP onto the textile
3 Seal for 5 seconds
4 Remove protective layer immediately after sealing
5 Seal for 10 to 15 seconds**
* Sealing on cotton, polyester etc.: 10 sec at 350 °F
** Sealing on PVC, polyurethane etc.: 15 sec at 275 °F
