- **One Year Warranty**

Epson LQ-590
Dot matrix label Printer

Proven Technology

RELIABLE

Thermopatch first introduced dot matrix printing over 30 years ago. Today thermal printing is the predominant technology used, but dot matrix labels are still a reliable label solution. (See our EOS or SQUIX4M printer for more inforation on thermal printing)

The **Epson LQ-590** 24 pin dot matrix printer comes standard with a second tractor feed and a label roll holder that attaches in the back of the printer. The second tractor feed helps stabilize the label, making the printing looking sharp and clean.

The dot matrix labels are designed to go through industrial laundry washings and still be readable after many wash cycles.

Optional Accessories
- Titan label printing software (Not compatable with Windows 10)

Label Tape
- A wide range of dot matrix label sizes and colors are available.

Ink Ribbons
- RC0890-24 - Indelible ink cassette
